

**To the resident****Stormwater Pit Upgrade – Bringenbrong Drive, Buderim****Project summary**

Sunshine Coast Council is committed to maintaining our infrastructure across our region.

As part of this year's stormwater renewal program, council is replacing a stormwater inlet headwall on Bringenbrong Drive, Buderim. Please refer to figure 1 overleaf.

A headwall is a small retaining wall built at the basin of a storm water drainage pipe.

The renewal is required to reduce any erosion to the pipe, and surrounding area, caused by the constant flow of water.

**Start date**

Work is scheduled to start the week beginning Monday 6 March 2023. Construction is expected to be completed within two weeks, weather and site conditions permitting.

Work will occur between 7am and 5pm on weekdays.

**Property access and parking**

During works, access to properties will be maintained, however there will be a temporary loss to on-street parking to facilitate construction.

**Traffic management**

To ensure the safety of all road users, traffic management measures will be in place throughout the project, including temporary construction fencing and staffed traffic control.

Your patience during construction is appreciated.

**Further information**

For further information about this project, please contact council's project officer Clint Jones via the details below (please quote project number K4187).

**A note from your local councillor**

Hi all,

I am very glad to see council spending ratepayer funds on maintaining assets like our stormwater network. As always, if you see or know of issues in your area, you're always welcome to contact me directly on 0400 720 103 or via email at
