

To The Resident

Pathway Solar Lighting – Chantilly Park, Beerwah

Project summary

Sunshine Coast Council will soon be installing a single solar standalone light pole in Chantilly Park.

The light is to come on at dusk, run for four hours and then dim to a pre-set level for the rest of the night (all year round).

The intention is to provide 'security lighting' throughout the night for people walking through the park, but not at a lighting level that will cause disturbance to residents immediately adjacent the park.

Start date

Work is scheduled to commence mid-April 2023.

Construction is expected to be completed within one week, weather and site conditions permitting.

Work hours will be 6:30am – 5:00pm, Monday to Friday.

Property access and parking

Every effort will be made to minimise construction impacts.

Contractors will confine the works area to maintain public safety.

The footpath and playground in the park will remain open for use.

Thank you in advance for your patience during construction.

Further information

If you require further information about the project contact Project Officer Mark Knight through Council's customer service via the details below at the bottom of the page (quote Pathway Solar Lighting – K2990 Chantilly Park, Beerwah).

A note from your local councillor

A while ago the local community asked me to consider this park pathway lighting project to improve safety. Initially because of power supply issues, the cost looked really expensive, and this meant a long delay due to a lack of a planned budget; fortunately, staff identified a more affordable solar powered solution, and the project has proceeded. Regrettably, recent acts of mindless vandalism have shown its sadly needed for that reason as well!
