Supply Planning

Anaplan

Inventory Planner

- Review demand forecast
- Run what-if scenarios
- Develop preliminary inventory requirements

Supply Planner

- Review adjusted demand forecast and inventory requirements plan
- Incorporate supplier / production / distribution constraints into a constrained plan
- Collaborate with suppliers / operations to revise supply plan
- Build final supply plan (e.g. master production schedule, production plan, purchase plan)

Supply Chain Management

- Review finalized supply plan
- Provide feedback and adjustments as necessary
- Promote supply plan to S&OP, distribution requirements plan, ERP and operational execution systems

Supply Planning

Anaplan
