UNIQUE COLLABORATION IN THE BELGIAN PAYMENT SECTOR

POM QR codes can now also be scanned with the Payconiq by Bancontact app

ANTWERP 09/10/2019 - POM QR codes - which appear more and more on invoices in Belgium - can from now on also be scanned with the Payconiq by Bancontact app.

POM and **Bancontact Payconiq Company** agreed to link their systems to make this possible.

Nathalie Vandepeute, CEO at Bancontact Payconiq Company explains: "The collaboration with POM is unique in Belgium and fits perfectly with our mission to make the payment experience faster, easier and smoother for everyone. By linking our systems more and more people will be able to enjoy the convenience of QR code payments."

"It is now indeed super easy to pay a bill with a POM QR code from within your favorite payment app," adds **Tom Totté**, CCO and co-founder of POM.

"By adding this new option to scan POM QR codes, we're now offering the most comprehensive invoice payment solution in Belgium. Paying an invoice has never been easier!"

There are now four different ways to scan a POM QR code (and to pay the corresponding invoice afterwards):

1. With the Payconiq by Bancontact app;
2. With a smartphone camera (works for iPhones and most Android devices);
3. With any QR reader app;
4. With the POM app;

About POM

POM optimizes the invoicing process for both sides of the market: billers and customers. POM's invoice payment services allow companies – large and small – to both significantly lower their collection costs and speed up receivables. At the same time their customers are able to enjoy POM's superior payment experience in a multichannel environment (across e-mail, mobile, messaging and paper).

POM's customers are active in a wide range of sectors: from energy companies to governments, hospitals, social insurance funds, insurance companies, ... but also schools and sports clubs.

POM was founded in 2014 and is 100% made in Belgium.
