Can generative AI be sustainable?

VU AI in Education Show & Share Workshop

Spectrum / Line-up

Statements

Part 1: Usefulness of AI

ChatGPT helps with brainstorming or initiating projects

ChatGPT helps to improve writing

ChatGPT is an oracle for information, better than Wikipedia
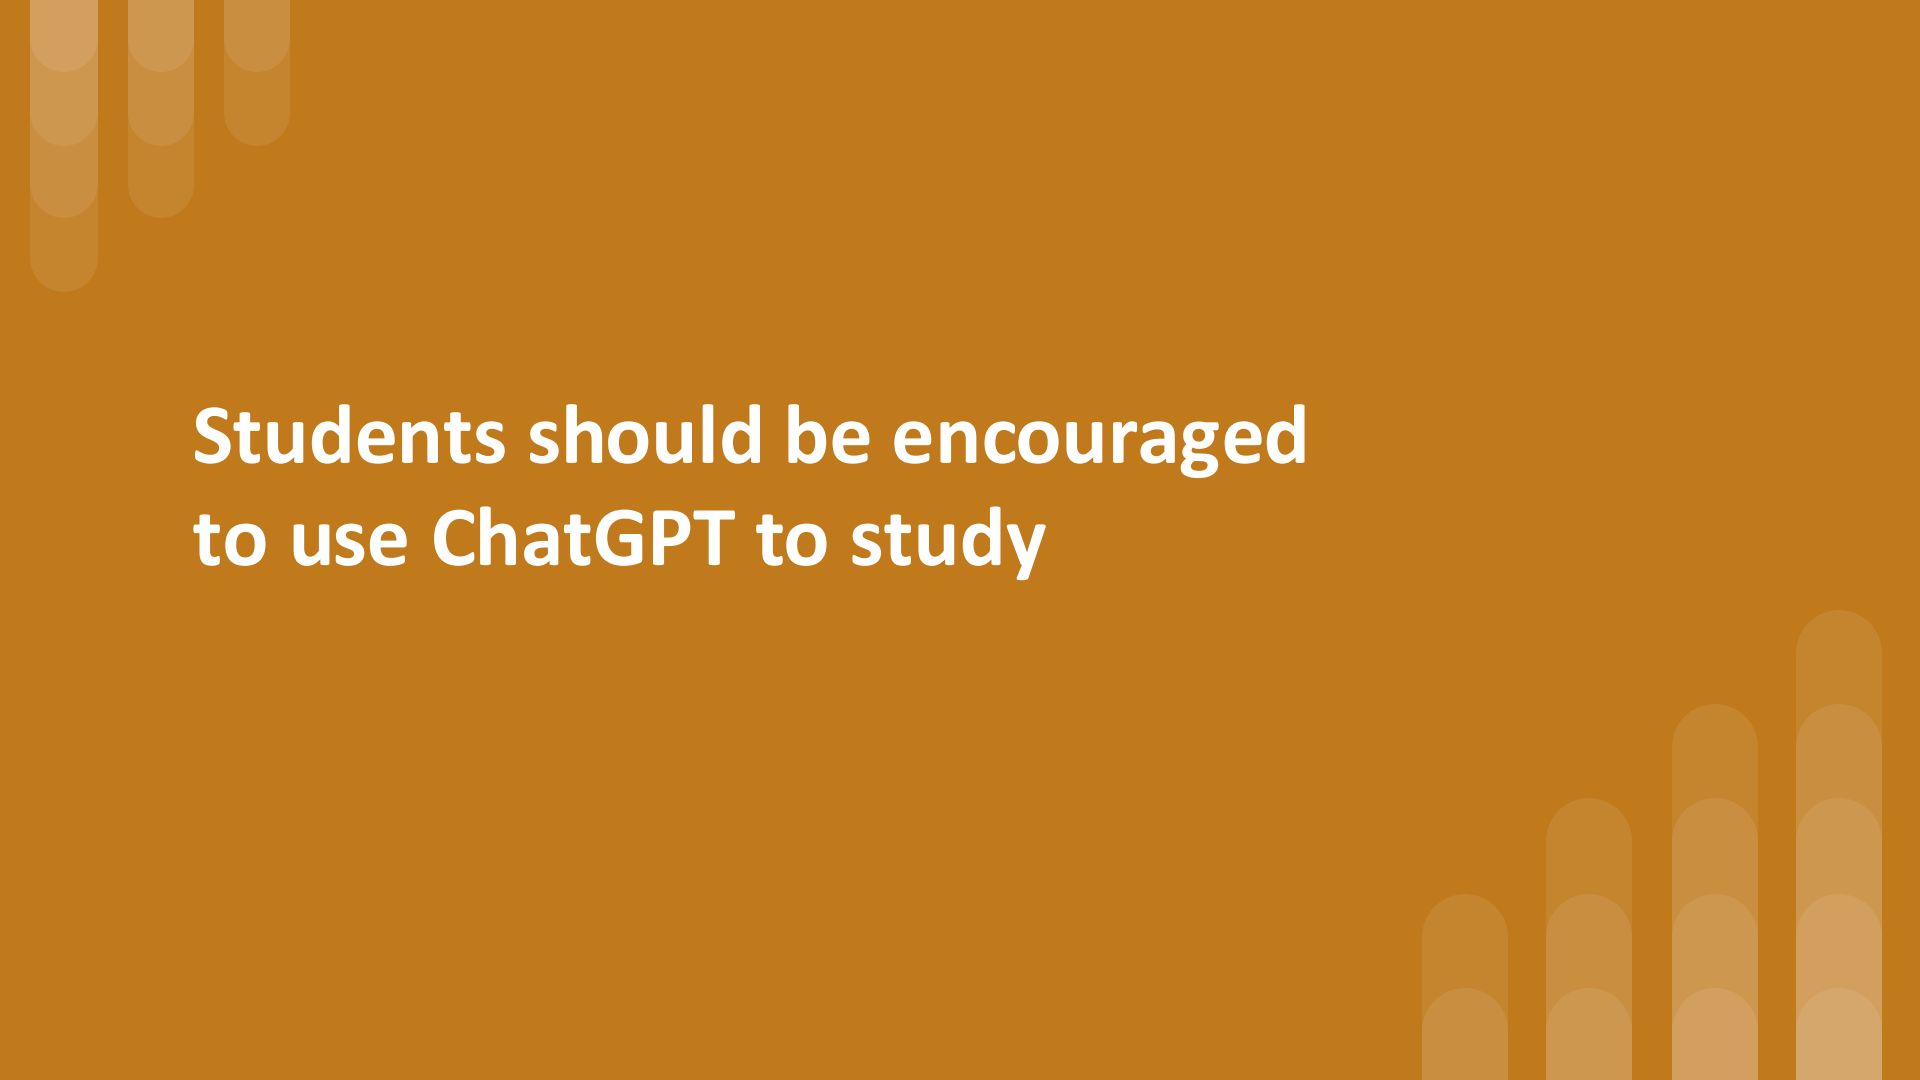

Statements

Part 2: Desirability of AI
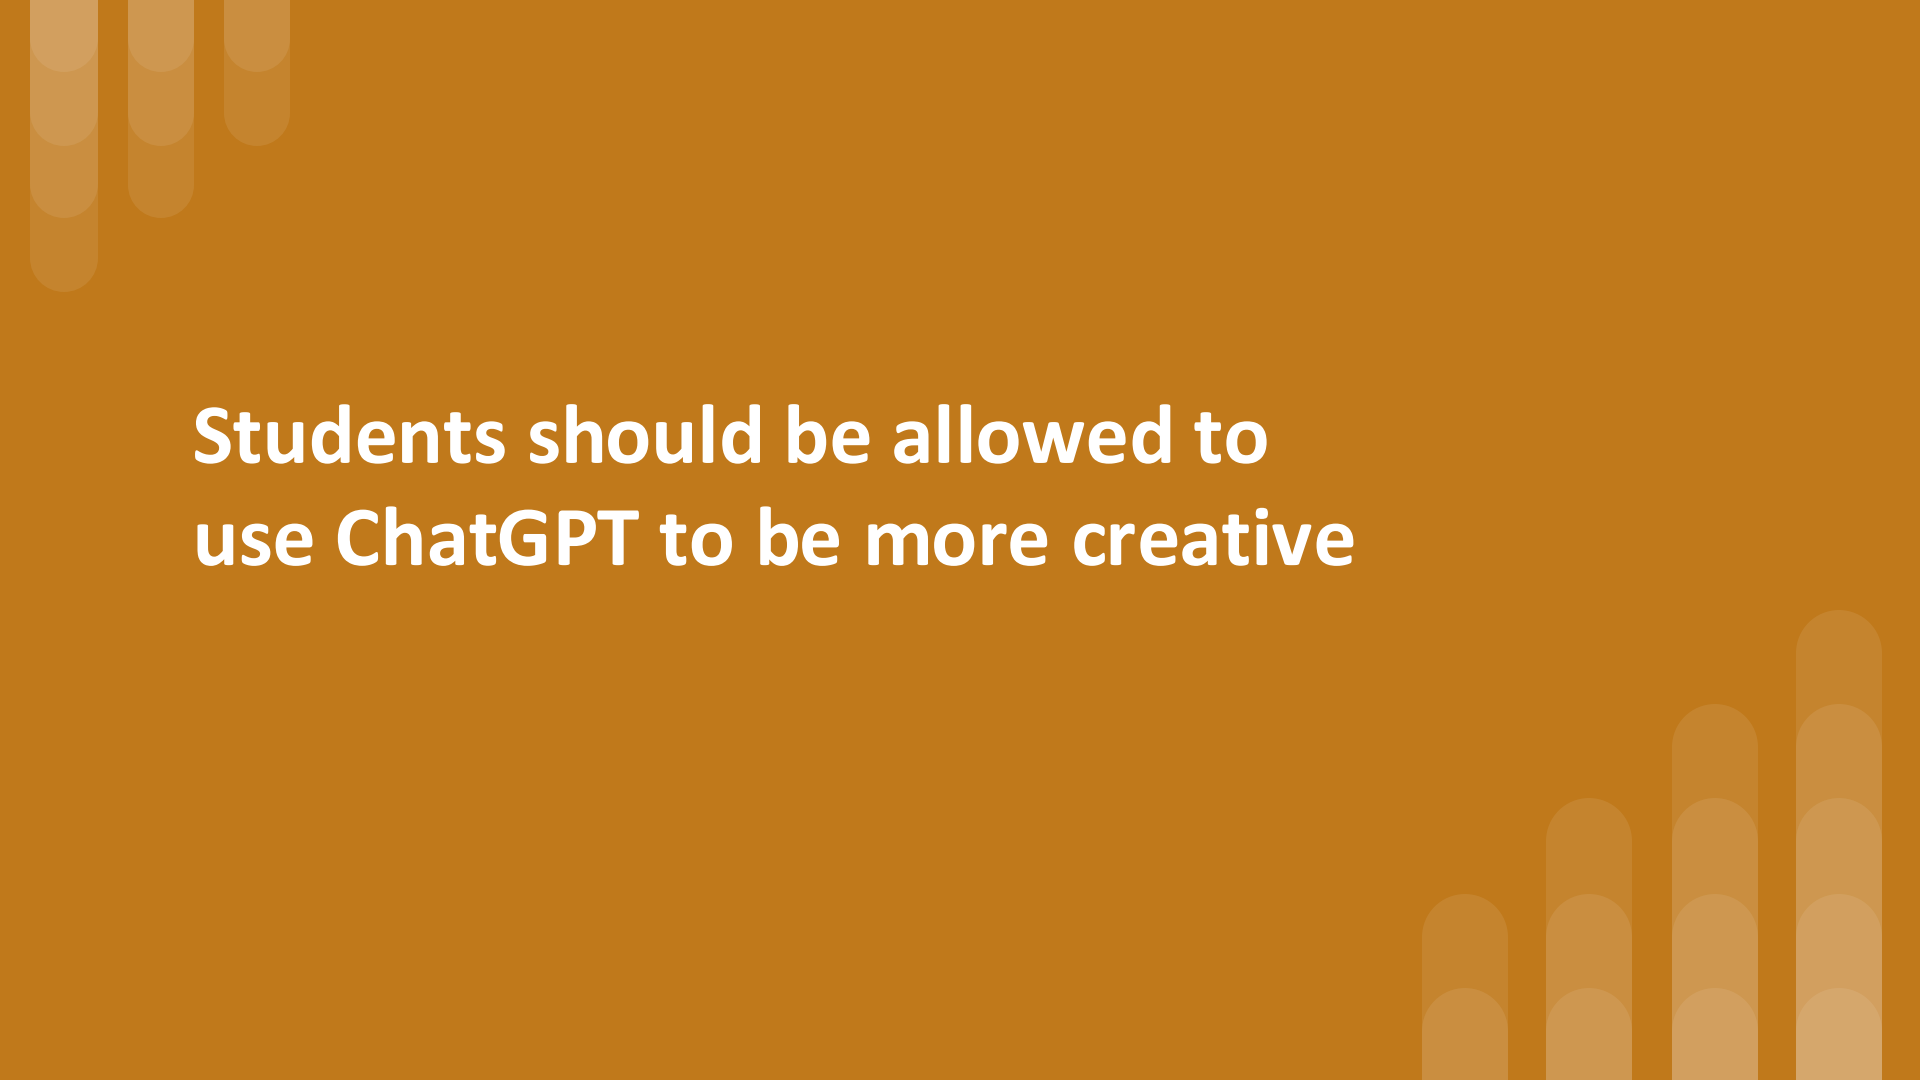

Students should be allowed to use ChatGPT for brainstorming

Students should be allowed to use ChatGPT to improve writing

Students should be allowed to use ChatGPT to be more creative

Students should be encouraged to use ChatGPT to study

Students should, given ChatGPT's unsustainability, bear the responsibility of not using it

rather than placing the responsibility more with the producers of ChatGPT or governments to address its environmental impact

VU-UvA taskforce AI in education

The taskforce has produced three recommendations for VU and UVA:

- Technical, legal and ethical checklist for the use of AI at UvA/VU

- Preconditions for exploratory research on AI in education

- AI literacy

Sustainability is missing?

Co-creation of AI guidelines

- In groups: co-create guidelines for dealing with AI in a sustainable way (building upon the work of the Taskforce)
- 1 minute pitches on all the groups' guidelines
- 1 sentence/conclusion for the general wrap-up
