Use display with laptop or tablet:
1. Use display via HDMI or VGA:
   1. Connect device via HDMI or VGA cable to the display
   2. Display is external screen of the laptop, all functionalities can be used
2. Use display via wireless streaming
   1. Connect to local WIFI accespoint:
   - Choose from your list of available WiFI networks the accespoint of the room you are in, to be recognized as WiPG-O2-<roomnumber>. For instance WiPG-O2-Ø2WØ4 for room Ø2WØ4 (Attention: Ø is zero sign)
   - Password is 66ØØO2<roomnumber>, in case off roomnumber Ø2WØ4: 66ØØO2Ø2WØ4
   - Enter code presented on the display and connection is setup.
   - **Restriction:** the WiPG connection has no Internet connectivity and blocks internet connectivity on the source device

   2. When using Apple tv:
   - Choose Apple TV on the device: Apple-O2<roomnumber>, for instance Apple-O2Ø2WØ4.
   - Enter the code presented on the display: Apple TV is ready for use.

   3. When using Wepresent:
   - Install Wepresent (MirrorOp) software on Windows/Mac device
   - Install via WiPG accesspoint: In Internet browser type the IP adres of the WiPG. Choose download and install the software.
   - Requires MirrorOp app on smartphone and tablet (download from the Google Play or Apple store).
