

Step 4 Study programme characteristics

What does a study programme have to offer you?

What is important to you? Make a top 5 of characteristics that are important to you. You may add other characteristics yourself (1 is not important and 5 is very important).

1-5	Programme description
	Has a good combination of theory and practice
	Prepares for a concrete profession
	Leads to a profession with many personal contacts
	Stimulates your creativity
	The atmosphere appeals to you
	A lot of analysing and studying theories
	Leaves enough time for other things
	Putting your mathematical knowledge to good use
	Has a good location
	Wide orientation so you can go in all directions
	Requires you to be able to work accurately
	Trained as a researcher
	International orientation
	Majority Dutch-speaking
	Majority English-speaking
	Work together a lot
	The pace of learning is high
	Offers a lot of structure and guidance
	You can earn a lot of money with it later
	Focused on social relevance
	Very practice-oriented
	Training for a specialism
	You will gain a lot of prestige and status later
	You can contribute to a better world
	Is broad, so that you can still go in all directions
	Can easily be combined with another programme
	Has inspiring scientists and teachers
