

CORDLESS WELDER

AccuPocket 150. The Fronius AccuPocket 150 being the world's first-ever welding solution with a high-performing lithium-ion rechargeable battery, allows the end-user to weld 18-22 3/32" electrodes on a single charge. An intelligent control system using AccuBoost Technology ensures that the battery and the welding electronics work together in perfect harmony ensuring perfect stick welding characteristics. In addition, the IP23 rating ensures this machine withstands harsh environments and everyday welding conditions. The Fronius AccuPocket has three operating modes: Battery Mode, Hybrid Mode (while plugged in) & Generator Mode (which only requires a 2Kva generator).

MLL 907322

MACHINE MILLERMATIC 252 MIG WELDER 230/460/575V

Highest output in its class. Weld loner on high-end applications. Infinite voltage control with self-calibration digital meters that permit presenting of voltage and wire feed speed. Ensures precise parameters and accuracy. Integrated digital timers come complete with presettable preflow/postflow, burnback, spot and delay (switch) timers. Independent timers for MIG and spool gun.

MLL 907722

MACHINE THUNDERBOLT 210 DC STICK WELDER

Nearly 100 lbs. lighter so you can work smarter not harder by bringing the welder to the work. It's portable so it is easier to carry and store. More powerful - up to 85 more amps compared to leading competitive machine means you can weld thicker material. Thunderbolt 160 model features dual voltage with multi-voltage plug. Allows for connection to 120 or 240 volt receptacles without tools. Choose the cord that fits the receptacle and connect into the power cord.

MLL 951639

EXTRACTOR FUME FILTAIR CAPTURE 5 230V 10FT ARM

Innovative, extended-capture fume extraction system designed specifically for welding. The Capture 5 features exclusive ZoneFlow technology, which creates a much larger capture area than existing source-capture products and minimizes arm interactions. Capture 5 is far more effective than ambient fume extraction systems.

MLL 907584

MACHINE SPECTRUM 875 AUTOLINE PLASMA CUTTER MILLER

875 Auto-Line unit automatically connects to any primary input voltage from 208 - 757 volts single or three phase, 50 or 60 Hz. Line voltage compensation provides peak performance power under variable conditions (power fluctuations up to 15%) for steady cuts and cleaner ending cuts.

LIN K3963-1

MACHINE WELDING POWER MIG 210 MP

Light weight and portable just 40lbs. Ready. Set. Weld - intuitive push and turn digital controls make startup a breeze. 210 Amps the power to take any job.

LIN K5126-1

MACHINE WELDING SQ WAVE TIG 200

Simple user interface. Built in settings for more cleaning action on wider or tighter arc configurations for aluminum welding. TIG welding for critical welds where precision and bead appearance are important. Plugs into standard 120V or 230V circuit.

LIN 200-M

EXTRACTOR FUME W/ MERV 14 FILTER

Lincoln mobile fume extractors are lightweight, rugged design, low vacuum/high volume filtration system designed for extraction and filtration of welding fume. Ideal for facilities that require welding fume extraction in multiple locations, including maintenance departments, general fabrication and job shops, and industrial welding environments.
