

SOLVING PROCUREMENT & TESTING CHALLENGES

Electro Rent and TEVET – Your Resource for Mission-Critical Projects

With more than \$1 billion in inventory and immediate shipping to more than 100 countries, Electro Rent offers many acquisition options, including renting equipment, buying new and Certified Pre-Owned instruments.

Electro Rent has a longstanding business relationship of partnering with TEVET, a leading supplier of precision Test and Measurement equipment and Modular Instrumentation for the Aerospace and Defense Industry.

TEVET adds significant value with its problem-solving procurement process, product maintenance and repair options, and customer support across the complete lifecycle. TEVET can also supply science equipment and MRO gear.

Why TEVET?

- **Logistical Expertise:** Reduce the number of vendors you use by placing one PO. With TEVET you can place distribution and direct requirements, and multiple manufacturers on the same order. We can manage your entire test requirement BOM, including components and accessories, with one point of contact.
- **Safe & Secure Partner:** TEVET is certified ISO9001:2015, AS9120B, and we are NIST SP 800-171 Compliant.
- **Powerful Support:** When you purchase through TEVET, you receive support from three partners: TEVET, Electro Rent and the original equipment manufacturer. One point of contact, with expert customer service.
- **Save Time:** TEVET is a preferred supplier with pre-negotiated terms and conditions with most A/D companies. This reduces the timeline from requisition to purchase order placement. You get what you need faster.
- **Reduce Costs:** Combining requisitions, BOM management, One-Stop shopping all save time and money, while TEVET's buying power supports your budget requirements.
- **Small Business Contract Requirements:** Achieve your contract requirement goals with a stable resource. In business for over 18 years, TEVET is proud to be a Service-Disabled Veteran Owned, HUBZone Certified, Small Business.

As a world-leading supplier of test and measurement equipment, Electro Rent provides objective product guidance, application engineering support and a local, on-site presence—both before and after purchase.

Your success is our mission. Trust **TEVET** to make the complicated easy.

LIBERTY NP

In today's rapidly evolving wireless landscape, modern radar, electronic warfare, and signal intelligence systems are generating, processing, and recording wide signal bandwidths at a broad range of frequencies.

Test engineers need flexible tools that can provide adaptability in electronic warfare and 5G and other new signal types so they can respond to emerging threats. The Liberty NP software-defined instrument (SDI) brings a modular and flexible, lower total cost of ownership, COTS solution to real-time RF testing to threat response applications.

KEY FEATURES

- Available measurement frequencies of 6, 14, 18, 26.5, 40 GHz, and 54GHz, supporting up to 1GHz of bandwidth per channel
- Modular, compact, multi-function, software-defined architecture can reduce the size, weight, and power (SWaP) over conventional box instruments by a factor of 2 to 10
- Unique, channelized RTSA enhances the detection of small amplitude LPI signals by up to 30 dB
- Up to 128 TB of high-speed SSD RAID per chassis, eliminating the need for external data recorders
- Precision 2 - 8+ CH multi-channel sync with inter-channel time and phase skew < 10ps and < 1 degree, respectively
