

Are you spending too much of your time trying to find assets you own or rent?

Free yourself from costly and time-consuming searches with automated equipment updates through IoT tracking.

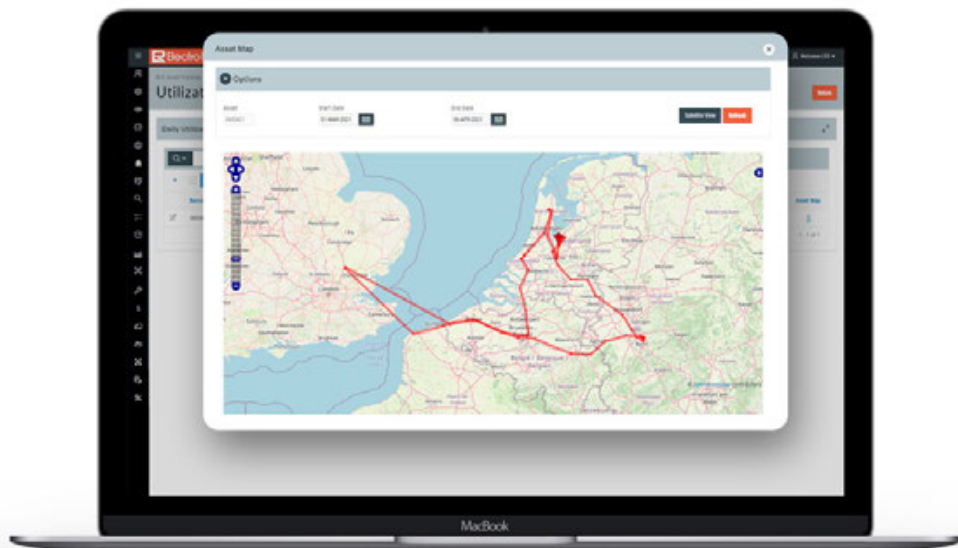

Always in control of your assets.

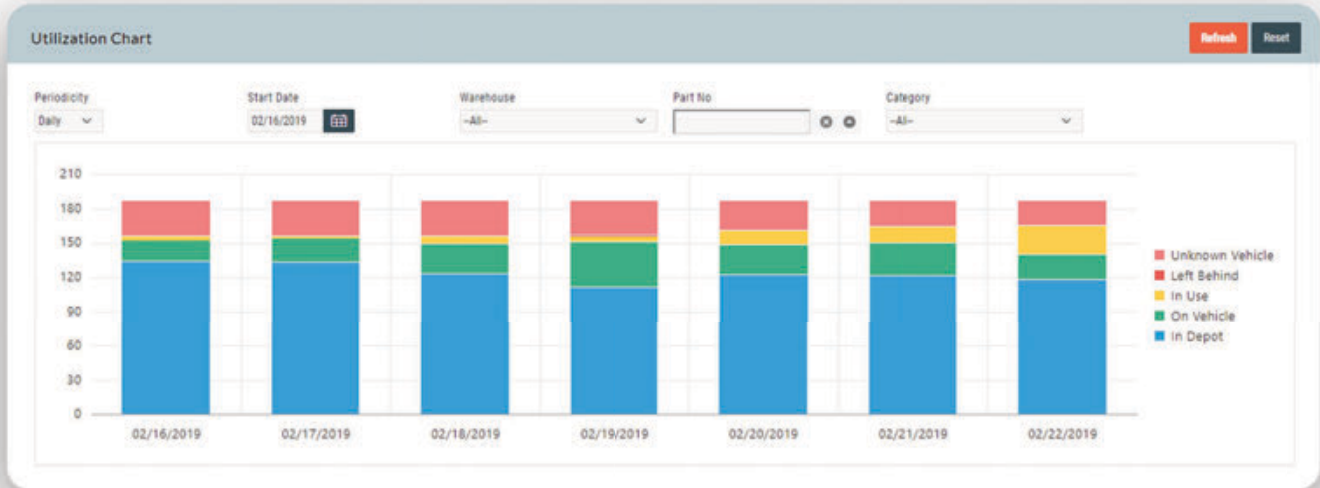

Manage and share your assets more effectively with IoT tracking

Our innovative new asset tracking service uses state of the art 5G NB-IoT/LTE-M IoT (internet of things) technology to keep track of any assets you own or rent. This is available to all our rental customers and growing numbers of our Telecoms, Power and Industrial customers are taking advantage of the service to track their assets quickly and efficiently. This helps them manage and share their assets more effectively, saving them time and money.

Key Features

- Track assets anywhere globally – wherever you have a mobile phone network available to transmit the location. No need for readers in depots or vans.
- Find lost or stolen assets quickly.
- View assets and track asset movements on a map with the cloud-based online account. Zero in on assets with filters by depot, category, model and date filters, asset trails with date filters and satellite view.

- Access the system from anywhere through your cloud based online account - no local software installation required.
- Offered as a Software as a Service (SaaS) embedding latest OWASP (Open Web Application Security Project) cyber security standards via web browser from anywhere removing the need for internal integration or IT costs.
- No hidden costs - includes hosting and global data roaming costs.
- Easily and quickly locate assets to within 5m. Location based on multiple reading methods including GPS satellites (5-10m), WiFi hotspots (10-20m) or Cell (100m+). Includes accelerometer to trigger movement events.
- Extra Long battery life - the rechargeable battery version will last 4-5 years between charges (based on 8 Cell or WiFi location points per day).
- Unlimited battery life with optional solar panel tracker.
- Compact and easy to install - Tracker size 79 x 79 x 26mm. Multiple attachment methods include flanges with holes for bolts or cable ties, or 3M double sided pad. IP67 rated. CE and RED certified. FCC pending.
- Underpinned by our market-leading LEO Asset Management solution and Oracle Cloud.
- Our bespoke ERP integration service with internal IT systems is available on request.
- Rental data feeds for seamless views of rented and owned assets. Mirrors and extends rental data views in our free MyER customer portal service.

Electro Rent fully complies with all applicable data privacy legislation, including the GDPR.

For more information, please contact your local account manager and, together with our Asset Management team, they will work with you to find the right solution for your business.
