Selective Radiation Meter

SRM-3006

Selective measurement of high frequency electromagnetic fields

Complete, easy to use test system, consisting of a base unit and measuring antennas, for non-directional detection of fields and their sources in the frequency range from 9 kHz to 6 GHz

- Measurements conforming to ICNIRP and national standards with results displayed directly in terms of the permitted limit value
- Fast, reliable results using predefined measurement routines, setups, and automatic settings
- Extrapolation to maximum exposure levels and evaluating pilot signal information with LTE -FDD/TDD and UMTS operating modes
- Scope mode for short term analysis of pulsed signals and long term recording of variable exposure levels
- Editable tables for automatic correlation of results with telecommunications services (e.g. broadcasting, GSM, WiMAX)
- Individual preparation of field campaigns with subsequent evaluation and handling of large quantities of measurement data
- Suitable for outdoor use: Radiation protected, robust, splash-proof, ergonomically designed; uses exchangeable rechargeable batteries; equipped with integrated GPS and voice recorder

THE SRM AND ITS APPLICATIONS

The Selective Radiation Meter SRM is a compact, frequency-selective measuring system for safety analysis and environmental measurements of high-frequency electromagnetic fields. It covers broadcasting, mobile telephony, and industrial frequencies from the lowest long-wave range up to the latest wireless applications and evaluates the field exposure level in accordance with international or national standards.

Where the field environment is unknown – in offices, factory buildings, public places, or private homes – the SRM provides authorities and measurement service providers with a rapid overview of the field sources that are relevant to human safety.

Where the field situation is known, such as at so-called "shared sites", where several service providers share a common antenna site, the SRM shows the overall field exposure level as well as the proportions due to each service as an absolute value or as a percentage of the permitted limit value.

Users can resolve services down to individual channel accuracy and measure their contribution to the field emission with the SRM. It is also possible to integrate over the entire frequency range of the service and display the absolute result or the value relative to the permitted limit.

OPERATION AND USE

All functions and parameters can be set directly on the SRM basic unit via menus and the numerical keypad, softkeys, or the rotary control. As well as this, the SRM also provides facilities for saving and recalling measurement settings (setups) and entire measurement sequences (routines). The PC software included with the device, "SRM-3006 Tools", includes editable tables for antennas and cables from other manufacturers, user-defined evaluation curves, and lists of services and operators.

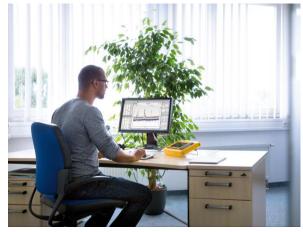

OPERATING MODES

The SRM is designed for everyday use and has operating modes tailored to the main areas of application: Safety Evaluation, Spectrum Analysis, Level Recorder, Scope, UMTS and LTE. Details about these operating modes and other functions are given in the Specifications.

ANTENNAS

Narda offers a broad range of three-axis and single-axis measuring antennas for electric fields (E-fields) and magnetic fields (H-fields). The three-axis antennas are advantageous in practice because they give isotropic (i.e. non-directional) results automatically.

DEFINITIONS AND CONDITIONS

Conditions

Unless otherwise noted, specifications apply after 30 minutes warm-up time within the specified environmental conditions. The product is within the recommended calibration cycle.

Specifications with limits

These describe product performance for the given parameter covered by warranty. Specifications with limits (marked as <, \leq , >, \geq , \pm , max., min.) apply under the given conditions for the product and are tested during production taking measurement uncertainty into account.

Specifications without limits

These describe product performance for the given parameter covered by warranty. Specifications without limits represent values with negligible deviations which are ensured by design (e.g. dimensions or resolution of a setting parameter).

Typical values (typ.)

These characterize product performance for the given parameter that is not covered by warranty. When stated as a range or as a limit (marked as <, \leq , >, \geq , \pm , max., min.), they represent the performance met by approximately 80 % of the instruments. Otherwise, they represent the mean value. The measurement uncertainty is not taken into account.

Nominal values (nom.)

These characterize expected product performance for the given parameter that is not covered by warranty. Nominal values are verified during product development but are not tested during production.

Uncertainties

These characterize an interval for a given measurand estimated to have a level of confidence of approximately 95 percent. Uncertainty is stated as the standard uncertainty multiplied by the coverage factor k=2 based on the normal distribution. The evaluation has been carried out in accordance with the rules of the "Guide of the Expression of Uncertainty in Measurement" (GUM).

SPECIFICATIONS • BASIC UNIT

| 3006 | | | | | | | |
|---|---|---|--|--|--|--|--|
| Measurements vs. frequency | Spectrum Analysis Safety Evaluation | | | | | | |
| Measurements vs. time (Zero Span) | Level RecorderScope (Option) | | | | | | |

| Measurement principle | Spectrum analysis | | | | | |
| Resolution bandwidth RBW, (-3 dB nominal) | 10 Hz to 20 MHz | | | | | |
| Resolution bandwidth RBW, (-3 dB horninal) | (in steps of 1, 2, 3, 5, 10, 20,) | | | | | |
| Video bandwidth VBW | Off, 0.2 Hz to 2 MHz | | | | | |
| | (in steps of 1, 2, 3, 5, 10, 20, coupled with selected RBW) | | | | | |
| Filter Type | Gaussian | | | | | |
| Shape factor (-60 dB/ -3 dB) | 3.8 typical | | | | | |
| | Individually selectable traces for: | | | | | |
| | | | | | | |
| | Act: Displays instantaneous (actual) spectrum | | | | | |
| | Max: Maximum hold function | | | | | |
| | Avg:Average over a selectable number of spectra (4 to 256) | | | | | |
| Result types | or a selectable time period of 1 to 30 minutes | | | | | |
| | Max Avg: Maximum hold function after averaging | | | | | |
| | Min: Minimum hold function | | | | | |
| | Min Avg: Minimum hold function after averaging | | | | | |
| | Standard: Display of the selected safety standard | | | | | |
| | SAVG: Spatial Averaging; Types: "continuous" or "discrete" | | | | | |
| | Highest peak, next peak right, next peak left, next higher peak, next lower peak | | | | | |
| | Information provided by Marker: frequency, level, service name according to the selected | | | | | |
| Marker functions | service table. | | | | | |
| | Delta marker to measure difference in level and frequency of the same trace or to display the | | | | | |
| | difference between two different traces e.g. average and maximum at the same frequency. | | | | | |
| Evaluation functions | Peak table (list of up to 50 highest peaks) | | | | | |
| | Integration over a user-specified frequency range (channel power) | | | | | |
| Axis | X, Y, Z axis selection for single-axis measurements using a Narda Three-Axis Antenna or | | | | | |
| 7x13 | selection of isotropic measurements | | | | | |
| | Y-scale range: 20, 40, 60, 80, 100 or 120 dB | | | | | |
| Display functions | Y-scale reference: MR-100 dB to MR+20 dB (-130 dBm to +40 dBm) | | | | | |
| | Screen arrangement: help line, status lines on/off | | | | | |
| | Zoom Min: Sets the lower frequency limit of the zoom window | | | | | |
| | Zoom Max: Sets the upper frequency limit of the zoom window | | | | | |
| Zoom | Zoom Cent: Moves the zoom window along the frequency axis | | | | | |
| | Zoom Span: Changes the scale of the zoom window | | | | | |
| | Execute Zoom: Sets the zoom window limits to the selected frequency values | | | | | |
| | "Go to: mode" changes the operating mode with automatic parameter transfer for | | | | | |
| Extras (transfer of parameters) | Fcent and Fspan. | | | | | |
| | "Select Service" allows easy frequency settings by means of predefined service tables | | | | | |

| MODE SAFETY EVALUATION | | | | | |
|--|---|--|--|--|--|
| Measurement principle | Spectrum analysis, followed by integration over user-defined frequency bands ("services") | | | | |
| Number of services | 1 to 500, predefined by service tables on the instrument | | | | |
| | or created by PC software SRM-3006 Tools | | | | |
| Name of services | User definable, maximum 15 characters set by PC software SRM-3006 Tools | | | | |
| Channel bandwidth of a service (CBW) | Individually selectable for each channel, from 40 Hz to 6 GHz | | | | |
| Resolution bandwidth RBW, (-3 dB nominal) | Available bandwidths as for Spectrum Analysis mode. The following condition applies: RBW ≤ CBW _(narrowest service) / 4 Automatic: RBW setting depending on of the narrowest service Manual: can be set in the range of available RBWs Individual: separately defined for each individual service by PC software SRM-3006 Tools ("Others" needs to be switched off) | | | | |
| Detection | Root mean square value (RMS), integration time = 1 / RBW | | | | |
| Filter | See Spectrum Analysis mode | | | | |
| Result types | See Spectrum Analysis mode | | | | |
| Marker functions for bar graph view | Highest peak, next peak right, next peak left, next higher peak, next lower peak Information provided by Marker: frequency, level, service name according to the selected service table. Delta marker to measure difference in level and frequency of the same trace or to display the difference between two different traces (Result Types) at the same frequency. | | | | |
| Evaluation function | Distribution (percentage contribution of each service) | | | | |
| Axis | X, Y, Z axis selection for single-axis measurements using a Narda Three-Axis Antenna or selection of isotropic measurements | | | | |
| Display functions | Table view showing service names, the corresponding frequency bands, field strength per result type and RBW (when set to individual) Screen arrangement: help line, status lines on/off Sort function according to various criteria Bar graph of services showing contribution of the selected Result Types | | | | |
| Noise threshold Displays results only if they are above the typical noise floor when activated. The threshold is selectable (0, 3, 6, 10, 15, or 20 dB relative to the typical DANL). Measurement values below the threshold are shown as the absolute threshold val with "<" (less than threshold) | | | | | |
| Others On/Off | Others On: field strength in the frequency gaps between the specified services is measured Others Off: field strength in the frequency gaps between the specified services is ignored | | | | |
| Extras (transfer of parameters) | "Go to: <i>mode</i> " changes the operating mode with automatic parameter transfer for Fcent and Fspan. "Select Service Table" allows switching between predefined service tables | | | | |

| MODE UMTS P-CPIC | H DEMODULATION (C | PTION) | | | | |
|------------------------------|----------------------|---|--|--|--|--|
| Measurement principle | 3 | Demodulation of the P-CPICH (Primary Common Pilot Channel) as the basis for automatic assignment of measured field strength values to the individual UMTS radio cells | | | | |
| UMTS channel selection | on | By entering the center frequency (Fcent) | | | | |
| Frequency setting reso | olution | 100 kHz (for Fcent frequency entry) | | | | |
| Resolution bandwidth | RBW, (-3 dB nominal) | 3.84 MHz (fixed) | | | | |
| Detection | | Root mean square value (RMS), integration time = 10 ms | | | | |
| Filter - | Туре | Root-raised cosine (RRC) | | | | |
| Filler | Roll-off factor | α = 0.22 | | | | |
| Demodulation algorithm | ms | P-CPICH decoding dynamic typically -20 dB according EN50492 / IEC 62232 | | | | |
| Result types | | Individually selectable for: Act: Displays instantaneous (actual) channel power Max: Maximum hold function Avg: Average over a selectable number of measurements (4 to 256) or a selectable time period of 1 to 30 minutes Max Avg: Maximum hold function after averaging Min: Minimum hold function Min Avg: Minimum hold function after averaging Standard: Display of the selected safety standard | | | | |
| Evaluation functions | | Extrapolation factor adjustable from 1 to 100 in steps of 0.001 Ratio Pilot/Analog in dB | | | | |
| Axis | | X, Y, Z axis selection for single-axis measurements using a Narda Three-Axis Antenna or selection of isotropic measurements | | | | |
| | Displayed items | Up to 16 scrambling codes simultaneously Selection of individual scrambling codes Channel power for the selected Result Types Number of measurement runs since last reset | | | | |
| Results display Table layout | | Table format: Index, Scrambling Code, selected result types Total: Total power of all listed scrambling codes Analog: Analog measurement result for the selected UMTS frequency channel (no extrapolation) | | | | |
| Noise threshold | | In case of "Analog" results: values are displayed only if they are above the typical noise floor when activated. The threshold is selectable (0, 3, 6, 10, 15, or 20 dB relative to the typical DANL). Measurement values below the threshold are shown as the absolute threshold value marked with "<" (less than threshold) | | | | |
| Extras (transfer of para | ameters) | "Go to: <i>mode</i> " changes the operating mode with automatic parameter transfer for Fcent and RBW. "Select Service" allows easy frequency settings by means of predefined service tables | | | | |

| Noise threshold | | Displays results only if they are above the typical noise floor when activated. The threshold is selectable (0, 3, 6, 10, 15, or 20 dB relative to the typical DANL). Measurement values below the threshold are shown as the absolute threshold value marked with "<" (less than threshold). Only applies to the numerical result display (Value) | | | | |
| Extras (transfer of p | parameters) | "Go to: <i>mode</i> " changes the operating mode with automatic parameter transfer for Fcent and RBW. "Select Service" allows easy frequency settings by means of predefined service tables | | | | |
| SCOPE MODE (OF | PTION) | | | | | |
| Measurement princ | iple | Selective level measurement at a fixed frequency setting (Zero Span) | | | | |
| Туре | | Steep cut-off channel filter (app. raised cosine) | | | | |
| Filter | Roll-off factor | $\alpha = 0.16$ | | | | |
| Sweep Time | | 500 ns to 24 h (Time Span) | | | | |
| Time Resolution | | 31.25 ns up to 90 min | | | | |
| Resolution bandwid | th RBW (-6 dB nominal) | 100 Hz to 32 MHz (see Level Recorder Mode) | | | | |
| Video bandwidth (V | | Off, 0.01 Hz to 32 MHz (depending on the selected RBW) | | | | |
| | Magnitude Actual (high resolution) | ACT: Displays the instantaneous (actual) value. (time resolution = 1/RBW) Standard: Displays the limit of the selected safety standard | | | | |
| Result Type | Magnitude Condensed (long observation) | Magnitude Condensed allows to display the results over a long time period MAX: Maximum value within the time resolution interval (corresponds to peak detector). AVG: Average value within the time resolution interval (corresponds to RMS detector). MIN: Minimum value within the time resolution interval. Standard: Displays the limit of the selected safety standard. | | | | |
| Marker function | | Delta marker, Marker, highest peak, next peak right, next peak left, next highest peak, next lowest peak | | | | |
| Evaluation function | S | Duty cycle (ratio of average power to maximum power) | | | | |
| Triggering | | Programmable Trigger Delay, Trigger Edge and Trigger Level | | | | |
| | Free Run | Time signal runs continuously. | | | | |
| Trigger Mode | Single | Single triggering as soon as the selected conditions apply for Trigger Level, Trigger Delay, and Trigger Edge | | | | |
| ingger mode | Multiple | Same as for Single but with multiple subsequent triggering | | | | |
| | Manual Start | Time signals displayed instant by a button. | | | | |
| | Time Controlled | Time signals runs instant by date and time. | | | | |
| Axis | | X, Y, Z axis selection for single-axis measurements using a Narda Three-Axis Antenna or selection of isotropic measurements | | | | |
| Extras (transfer of p | parameters) | "Go to: <i>mode</i> " changes the operating mode with automatic parameter transfer for Fcent and RBW. "Select Service" allows easy frequency settings by means of predefined service tables | | | | |

| MEASUREMENT F | UNCTIONS | | | | | | |
|-----------------------|-------------------------|---|--|--|--|--|--|
| Detection of Narda r | neasurement antennas | Automatic consideration of antenna parameters after antenna is plugged in: antenna type, serial number, calibration date and antenna factors (see below). Automatic frequency range adjustment according to the connected antenna | | | | | |
| Antenna factors | | Used to display measurement results in field strength units Stored in all Narda antennas during calibration Antenna factor lists for antennas from other manufacturers can be created and transferred to the instrument using the PC software SRM-3006 Tools/TS | | | | | |
| Detection of Narda | Cables | Automatic consideration of cable parameters after cable is plugged in: Cable type, serial number, calibration date and loss factors (see below) Automatic frequency range adjustment according to the connected cable | | | | | |
| Cable loss factors | | Used for frequency response compensation of the power level display Stored in all Narda cables during calibration Cable loss lists for cables from other manufacturers can be created and transferred to the instrument using the PC software SRM-3006 Tools/TS | | | | | |
| Units | | With antenna: % (of the standard), V/m, A/m, W/m², mW/cm², dBV/m, dBmV/m, dBA/m, dBµV/m, dBm, dBV, dBmV, dBµV Without antenna: dBm, dBV, dBmV, dBµV | | | | | |
| Isotropic Measurem | ents | Automatic switching of the antenna axes when using one of Narda's three-axis measurement antennas followed by computation of the isotropic result. Support for sequential measurements using single-axis antennas with subsequent computation of the isotropic result. Both results are directly displayed as a spectrum curve or as numerical values | | | | | |
| Weighted Display | | In % of standard for human safety standards like ICNIRP, IEEE, FCC etc. New lists of exposure limits can be created and transferred to the instrument using the PC software SRM-3006 Tools/TS | | | | | |
| Correlation of result | s with telecom services | Service Tables specify the used frequency band, the name and the required resolution bandwidth (RBW) of up to 500 individual services in a single list. Thus measurement results can be easily assigned to a service even without the knowledge of the frequency (marker functions, peak table evaluation function, Safety Evaluation mode). Service Tables can be created either directly on the instrument or conveniently created and | | | | | |
| Setups | | transferred to the instrument using the PC software SRM-3006 Tools/TS Complete device configurations provide fast switching between different measurement tasks. Saved setups can be downloaded to a PC for archiving and uploaded back to the instrument using the PC software SRM-3006 Tools/TS | | | | | |
| Measurement Routing | nes | Automated sequences of setups (created using the PC software SRM-3006 Tools/TS) | | | | | |
| Results | Memory modes | Result stored as: Spectrum in Spectrum Analysis mode (SPECTRUM), Table in Safety Evaluation mode (SAFETY), Values in UMTS P-CPICH Demodulation mode (UMTS) as well as for LTE mode (LTE FDD and LTE TDD) Values for Level Recorder (LEVEL) and Scope (SCOPE) | | | | | |
| Memory | Conditional Storing | Conditional storing of results exceeding a specified threshold value (in all operating modes except "Scope") with individual storage rates and reset function | | | | | |
| | Time Controlled Storing | Long term monitoring up to 99 hours (in all operating modes except "Scope"). Settings for: start date, start time, duration and time interval (6 s to 60 min) | | | | | |
| 11-14 | Memory capacity | 128 MB (up to 8000 spectra, 4000 screenshots) | | | | | |
| Hold | | Button that "Freezes" the display; the measurement continues in the background. | | | | | |
| Operating language | | Selectable: English (Default), French, Spanish, Turkish, Simplified Chinese | | | | | |

| GENERAL SPECIFICATIONS |
| |
| Operating temperature range -10 °C to 50 °C (same as SRM basic unit) |
| Climatic Storage 1K3 (IEC 60721-3) extended to -10 °C to +50 °C |
| Transport 2K4 (IEC 60721-3) -40 °C to +70 °C |
| Operating 7K2 (IEC 60721-3) extended to -10 °C to +50 °C |
| Mechanical Storage 1M3 (IEC 60721-3) |
| Transport 2M3 (IEC 60721-3) |
| Compliance Operating 7M3 (IEC 60721-3) |
| Ingress protection IP 52 (antenna connected) |
| European Union Complies with EMC Directive 2014/30/EU and EN 61326 -1: 2013 |
| EMC Immunity EN: 61000-4-2, 61000-4-3, 61000-4-4, 61000-4-5, 61000-4-6, 61000-4-8, 61000-4-11 |
| Emissions EN: 61000-3-2, 61000-3-3, EN 55011 (CISPR 11) Class B |
| Safety Complies with European Low Voltage Directive 2014/35/EU and EN 61010-1: 2010 |
| Air humidity (operating range) < 29 g/m ³ (< 93 % RH at +30 °C), non-condensing |
| Weight 550 g |
| Dimensions 460 mm length; 135 mm x 90 mm antenna head dimension |
| Calibration 183 reference points The SRM applies linear interpolation between reference points. |
| Recommended calibration interval 24 months |
| Country of origin Germany |

b) Valid for the temperature range +15 °C to +30 °C, according to the definition on page 3

ORDERING INFORMATION • INSTRUMENT SETS

| SRM – Set Overview | Part Number | |
|---|--------------------|----------|
| SRM-3006, Selective Radiation Meter, Set 1/2, Basic Unit, no Antenna | | |
| Set includes: | | |
| - Selective Radiation Meter, Basic Unit, SRM-3006 | | |
| - RF-Cable SRM, 9kHz-6GHz, N 50 Ohm, 1.5m (3602/01) | | |
| - Carrying Strap for SRM (Basic Unit) (3001/90.02) | Set with Hardcase | 3006/101 |
| - Holding Strap for SRM-3006 Basic Unit (3001/90.12) | | |
| - Operating Manual SRM-3006, English | Set with Softcase | 3006/102 |
| Power Supply 12VDC, 100V-240VAC, all Plugs (2259/92.04) Software, SRM-3006 Tools (3006/93.01) | | |
| - Cable, USB 2.0, Master/Slave - A/B mini (2260/90.55) | | |
| - Cable, USB 2.0, Mastel/Slave - A/B IIIIII (2200/90.53) | | |
| SRM-3006, Selective Radiation Meter, Set 3/4, Basic Unit plus one Isotropic Antenna (420MHz-6GHz) | | |
| Set includes: | | |
| - Selective Radiation Meter, Basic Unit, SRM-3006 | | |
| - Antenna, Three-Axis, E-Field, 420 MHz-6GHz (3502/01) | | |
| - RF-Cable SRM, 9kHz-6GHz, N 50 Ohm, 1.5m (3602/01) | Set with Hardcase | 3006/103 |
| - Carrying Strap for SRM (Basic Unit) (3001/90.02) | Set with hardedse | 3000/103 |
| - Holding Strap for SRM-3006 Basic Unit (3001/90.12) | Set with Softcase | 3006/104 |
| - Operating Manual SRM-3006, English | | 0000,101 |
| - Power Supply 12VDC, 100V-240VAC, all Plugs (2259/92.04) | | |
| - Software, SRM-3006 Tools (3006/93.01) | | |
| - Cable, USB 2.0, Master/Slave - A/B mini (2260/90.55) | | |
| SRM-3006, Selective Radiation Meter, Set 5/6, Basic Unit plus two Isotropic Antennas | | |
| Set includes: | | |
| - Selective Radiation Meter, Basic Unit, SRM-3006 | | |
| - Antenna, Three-Axis, E-Field, 420 MHz-6GHz (3502/01) | | |
| - Antenna, Three-Axis, E-Field, 27 MHz-3GHz (3501/03) | | |
| - RF-Cable SRM, 9kHz-6GHz, N 50 Ohm, 1.5m (3602/01) | Set with Hardcase | 3006/105 |
| - Carrying Strap for SRM (Basic Unit) (3001/90.02) | Out with Out to an | 0000/400 |
| Holding Strap for SRM-3006 Basic Unit (3001/90.12) Operating Manual SRM-3006, English | Set with Softcase | 3006/106 |
| Operating Manual SRM-3006, English Power Supply 12VDC, 100V-240VAC, all Plugs (2259/92.04) | | |
| Fower Supply 12VDC, 100V-240VAC, all Flugs (2259/92.04) Software, SRM-3006 Tools (3006/93.01) | | |
| - Cable, USB 2.0, Master/Slave - A/B mini (2260/90.55) | | |
| | | |
| SRM-3006, Selective Radiation Meter, Set 7/8, Basic Unit plus one Isotropic Antenna (27MHz-3GHz) | | |
| Set includes: | | |
| - Selective Radiation Meter, Basic Unit, SRM-3006 | | |
| - Antenna, Three-Axis, E-Field, 27MHz-3GHz (3501/03) | | |
| RF-Cable SRM, 9kHz-6GHz, N 50 Ohm, 1.5m (3602/01) Carrying Strap for SRM (Basic Unit) (3001/90.02) | Set with Hardcase | 3006/107 |
| - Carrying Strap for SRM (Basic Unit) (3001/90.02) - Holding Strap for SRM-3006 Basic Unit (3001/90.12) | | |
| - Operating Manual SRM-3006, English | Set with Softcase | 3006/108 |
| Power Supply 12VDC, 100V-240VAC, all Plugs (2259/92.04) | | |
| - Software, SRM-3006 Tools (3006/93.01) | | |
| - Cable, USB 2.0, Master/Slave - A/B mini (2260/90.55) | | |
| | | |

ORDERING INFORMATION

Your local Narda representative will inform you of all possible options as well as the current ordering information and will be

pleased to provide you with advice.

| ANTENNAS | |
|---|------------|
| Antenna, Three-Axis, E-Field, 27 MHz - 3 GHz | 3501/03 |
| Antenna, Three-Axis, E-Field, 420 MHz - 6 GHz | 3502/01 |
| Antenna, Three-Axis, H-Field, 9 kHz - 250 MHz | 3581/02 |
| Antenna, Single-Axis, E-Field, 27 MHz - 3 GHz | 3531/01 |
| Antenna, Single-Axis, E-Field, 9 kHz - 300 MHz | 3531/04 |
| Antenna, Single-Axis, H-Field, 9 kHz - 300 MHz | 3551/02 |
| OPTIONS | |
| Option, UMTS P-CPICH Demodulation | 3701/04 |
| Option, Scope | 3701/05 |
| Option, LTE (for FDD networks) | 3701/06 |
| Option, LTE (for TDD networks) | 3701/07 |
| SOFTWARE | |
| Software, SRM-3006 Tools, Configuration SW (included in all sets) | - |
| Software, SRM-3006 TS, PC Evaluation and Remote | 3006/93.10 |
| ACCESSORIES | |
| Antenna Holder for Uniaxial/Triaxial Antenna | 3501/90.01 |
| Antenna Holder for Triaxial Antenna | 3501/90.02 |
| RF-Cable, 9 kHz – 6 GHz, N 50 ohm, 5m | 3602/02 |
| Tripod, Non-Conductive, 1.65 m with carrying bag | 2244/90.31 |
| Tripod Extension, 0.50m, Non-Conductive | 2244/90.45 |
| Battery Pack, Rechargeable, 7V2 / 6200 mAh (one is included in each SRM Basic Unit) | 3001/90.15 |
| Charger Set for Battery Pack, External | 3001/90.07 |
| Power Supply DC Vehicle Adapter | 2260/90.56 |
| Hardcase for SRM | 3001/90.03 |
| Carrying Strap for Hardcase (included in all sets with hardcase) | 3001/90.04 |
| Softcase for SRM | 3001/90.05 |
| Protective Soft Carrying Bag for SRM-3006 Basic Unit | 3001/90.13 |
| N-Connector Saver for SRM | 3001/90.14 |
| O/E Converter USB, RP-02/USB | 2260/90.07 |
| Cable, FO Duplex, F-SMA to RP-02, 0.3m | 2260/91.01 |
| Cable, FO Duplex, RP-02, 2m | 2260/91.02 |
| Cable, FO Duplex, RP-02, 5m | 2260/91.09 |
| Cable, FO Duplex, RP-02, 10m | 2260/91.07 |
| Cable, FO Duplex, RP-02, 20m | 2260/91.03 |
| Cable, FO Duplex, RP-02, 50m | 2260/91.04 |
| Earphone, 3.5mm Plug | 2400/90.03 |
| Operating Manual SRM-3006, German (select for free instead of English) | 3006/98.01 |
