

Top Titles *in the Art and Art History Collection*

Containing over 296 titles, the **Art and Art History e-book collection** raises critical questions about the story of art in the 20th and 21st centuries. These books **expand the narrative of art history** to include women, LGBTQ artists, artists of color, indigenous artists, and artists from Latin America, Africa, and Asia.

The collection includes major works in photography, museum studies, and visual culture, as well as volumes of artists talking about their own work. While the collection does not include any of the exhibit catalogs Duke University Press publishes and distributes, many of the books do include full-color digital illustrations and photos. Taken as a whole, the collection provides innovative new ways of **evaluating the role of art** in society.

Top Titles
